

HIGHLIGHTS OF COMMERCE AND INDUSTRY IN WISCONSIN

Manufacturing — Value added by manufacture in Wisconsin totaled \$61.2 billion in 1999, an increase of \$6.2 billion since 1997. The industry groups with the highest value added in 1999 were machinery, \$8.3 billion; transportation equipment, \$8.0 billion; food, \$7.0 billion; fabricated metal products, \$6.4 billion; and paper, \$6.2 billion.

At \$61.2 billion, Wisconsin ranked 11th among the states for value added by manufacture in 1999. Leaders in this category were California, \$218.2 billion; Texas, \$131.1 billion; and Ohio, \$118.2 billion. The national total for value added was \$1.96 trillion in 1999, an increase of \$137 billion over 1997.

Energy Consumption — In 1999, Wisconsin's total energy use per capita reached 326 million Btu, an all-time high for the state. This is about 15% higher than the usage rate in 1990. Compared to various national averages, Wisconsin places a heavier reliance on coal for its energy needs but uses less petroleum, natural gas, nuclear power, and hydroelectric power. As energy consumption has increased, Wisconsin, which was an exporter of electricity in the 1970s, has increasingly become a net importer. Of the petroleum consumed in Wisconsin in 1999, the largest portion, about 83%, was used for transportation, followed by residential (7%) and industrial (4%) usage.

Gasoline Usage and Tax — In 1998, each automobile in Wisconsin was driven an average of 13,015 miles. This is 1,290 miles, or about 11%, more than the national average of 11,725 miles per year. Wisconsin automobiles averaged 21.5 miles per gallon of gasoline, nearly the same as the national average of 21.4 mpg. These mileage and fuel economy statistics pertain to standard passenger cars and do not reflect the increasing use of minivans, pickup trucks, or sport utility vehicles (SUVs). The state motor fuel tax, which is indexed to account for the effects of inflation, increased 0.9 of a cent on April 1, 2001, to a total of 27.3 cents per gallon. (The federal government's gasoline tax on that date was 18.4 cents per gallon for a total of 45.7 cents per gallon in federal and state taxes.) Since indexing began on April 1, 1985, the average adjustment in state tax has been about 0.6 cents.

Financial Institutions — The number of banks operating in Wisconsin has decreased from the post-Depression high of 647 in 1982 to 325 in 2000. Over the same period, deposits increased from \$22.5 billion to \$62.6 billion. In 2000, Wisconsin's 40 state and federally chartered savings institutions had total deposits of \$12.8 billion.

In 1999, Wisconsin had 350 state-chartered credit unions with nearly 1.9 million members and \$8.7 billion in assets.

Corporations — In 2000, a total of 2,464 foreign corporations were licensed in Wisconsin, a 75% increase from 1,408 in 1990. Incorporation and licensing fees collected by the state in 2000 totaled \$12.2 million.

The following tables present selected data. Consult footnoted sources for more detailed information about commerce and industry.

¹Preliminary data.

²Import of electricity reflects estimated resource energy used in other states or Canada to produce electricity imported into Wisconsin. This resource energy is estimated assuming 11,300 Btu per kWh imported into Wisconsin. A negative number indicates energy used in Wisconsin to produce electricity exported out of state.

³Wisconsin total includes geothermal, solar, electricity produced from wood and waste, and other biomass energy.

April 1, 2001	27.3	0.9	3.4

*Beginning in April 1985, state motor fuel tax was indexed to take into account fuel consumption and inflation. The tax increase or decrease is calculated automatically annually, unless otherwise provided by law, based on the inflation rate from the National Highway Maintenance and Operations Cost Index and the percentage change in motor fuel consumption.
