

HIGHLIGHTS OF COMMERCE AND INDUSTRY IN WISCONSIN

Manufacturing — Value added by manufacturing in Wisconsin totaled \$51.0 billion in 1995, an increase of \$14.7 billion since 1991. The industry groups with the highest value added in 1995 were: industrial machinery and equipment, \$8.8 billion; food and kindred products, \$6.3 billion; and paper and allied products, \$6.3 billion.

In a national comparison for 1994, Wisconsin at \$48.3 billion ranked 11th among the states in value added by manufacturing. California with \$167.8 billion and Texas with \$99.4 billion led the nation in this category. The national total for value added was \$1.6 trillion in 1994, an increase of \$290.4 billion over 1989.

Energy Consumption — In 1995, Wisconsin's total energy use per capita was 295 million Btu, about 97% of the national average. This is an increase of 9 million Btu from the state's previous high of 286 million Btu in 1994 and over 10% above the 10-year low figure of 267 million Btu recorded in 1987. As compared to national averages, Wisconsin places a heavier reliance on coal for its energy needs but uses less petroleum, natural gas, nuclear power and hydroelectric power. Of the petroleum consumed in Wisconsin in 1995, the largest portion, about 81%, was used for transportation, followed by residential (9%) and industrial (4%) usage.

Gasoline Usage and Tax — In 1994, each automobile in Wisconsin was driven an average of 13,100 miles. This is 1,211 miles, or about 10%, more than the national average of 11,889 miles per year. Wisconsin automobiles averaged 21.6 miles per gallon of gasoline, nearly the same as the national average of 21.5 mpg. The state motor fuel tax, which is indexed to account for the effects of inflation and changes in consumption, increased 0.1 of a cent on April 1, 1997, to a total of 23.8 cents per gallon. (The federal government's gasoline tax on that date was 18.4 cents per gallon for a total of 42.2 cents per gallon in federal and state taxes.) Since indexing began on April 1, 1985, the average adjustment in state tax has been 0.6 cents.

Financial Institutions — The number of banks in Wisconsin has decreased from the post-Depression high of 647 in 1982 to 417 in 1995. Over the same period, deposits increased from \$22.5 billion to \$50.6 billion.

At the end of 1996, Wisconsin's 53 state and federally chartered savings institutions had a total of \$25.3 billion in assets. The 17 federally chartered savings institutions had assets of \$13.3 billion, and the 36 state chartered associations, including 24 savings banks, had assets of \$12.0 billion.

Corporations — During the 1996 fiscal year, domestic corporations filed 10,196 articles of incorporation, 165 more than in 1995. In addition, 1,476 foreign corporations were licensed in 1995, a decrease of 31 from the preceding year. Incorporation and licensing fees collected by the state in 1996 totaled \$7.3 million.

The following tables present selected data. Consult footnoted sources for more detailed information about commerce and industry.

April 1, 1996 ³	23.7	0.3	1.3
April 1, 1997	23.8	0.1	0.4

Note: Beginning in April 1985, the state motor fuel tax was indexed to mitigate the effects of declining fuel consumption and inflationary pressures on transportation costs. By law, the tax increase or decrease is automatically calculated, based on a cost factor (the inflation rate from the National Highway Maintenance and Operations Cost Index) and a consumption factor (the percentage change in motor fuel consumption). The federal gasoline tax has been 18.4 cents per gallon since October 1, 1993.

¹Legislative adjustment by 1987 Wisconsin Act 27.

²1991 Wisconsin Act 119 postponed fuel tax indexing until April 1, 1993. Both the 1992 and 1993 adjustments were made on that date.

³1993 Wisconsin Act 16 set aside the calculation of the consumption factor for 1995 and 1996 and provided fixed consumption factors for each year.

¹Includes only FDIC-insured and reporting noninsured commercial and mutual savings banks.

²Figures may not add to totals because amounts are presented in thousands and rounded.

³State total does not match sum of number of banks in individual counties because banks with branches in more than one county are counted in each county.
